Product no AS08 328

Abeta (1-42) | Amyloid-beta peptide 1-42

Product information

Immunogen Synthetic peptide chosen from human Abeta (1-42) protein. Amino acid sequence:

D-A-E-F-R-H-D-S-G-Y-E-V-H-H-Q-K-L-V-F-F-A-E-D-V-G-S-N-K-G-A-I-I-G-L-M-V-G-G-V-V-I-A

Host Rabbit

Clonality Polyclonal

Purity Serum

Format Lyophilized

Quantity 100 ul

Reconstitution For reconstitution add 100 µl of sterile water

Storage Storage Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please

remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to

the cap or sides of the tube.

Application information

Recommended dilution 1 : 1000 (DB), 1 : 3000 (ELISA), 1-2 μl/ml (IL)

Expected | apparent MW

4.5 kDa

Confirmed reactivity Human

Predicted reactivity Bovine, Chicken, Dog, Porcine, Rabbit

Not reactive in No confirmed exceptions from predicted reactivity are currently known

Additional information The antibody can detect Abeta (1-42), Abeta (1-28) Abeta (1-20) and A

The antibody can detect Abeta (1-42), Abeta (1-28) Abeta (1-20) and Abeta (1-17), This product exhibits a low reactivity to monomeric Abeta (1-42) as determined by SDS-PAGE and Western blotting, Immunolocalization: human tissue was paraffin-embedded and sectioned, De-waxed and rehydrated in an ethanol gradient, Antigens were retrieved in sodium citrate buffer (pH 6) at 95°C for 1 h, The tissue sections were separately incubated for 1 h at RT with primary antibody

and antibody binding was visualized with IgG Preoxidase Reagent Kit

Selected references Lindhagen-Persson et al. (2010). Amyloid- oligomer specificity mediated by the IgM isotype--implications for a specific protective mechanism exerted by endogenous auto-antibodies. PLoS One. 2010 Nov 10;5(11):e13928. doi:

. 10.1371/journal.pone.0013928.

Dot blot experiment

• Membrane: Nitrocellulose

• Blocking buffer: 5% dry milk in PBS, 0.1% Tween 20

Antibody dilution: 1:1000

• Secondary antibody: anti-rabbit (HRP)

Detection: Enhanced Chemoluminescence (pico) 30s

*Abeta (1-42) consists of both monomeric and partly aggregated mtrl.
