Product no AS10 708-25

8-Hydroxyguanosine | DNA/RNA oxidative damage (clone 15A3)

Product information

Immunogen 8-hydroxy-guanosine-<u>BSA</u> and – casein conjugates

Host Mouse

Clonality Monoclonal

Subclass/isotype IgG2A

Purity Total IgG fraction. Protein G purified.

Format Liquid

Quantity 25 μg

Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to

the cap or sides of the tube.

Additional information Protein G purified IgG2B in PBS, pH 7,4 with 0,09 % sodium azide and 50 % glycerol at concentration 0,65 mg/ml

Application information

Recommended dilution The optimal working dilution should be determined by the investigator

Recognizes markers of oxidative damage to DNA (8-hydroxy-2'-deoxyguanosine, 8-hydroxyguanine and **Confirmed reactivity**

8-hydroxyguanosine)

Not reactive in No confirmed exceptions from predicted reactivity are currently known

Additional information Protocol for immunostaining using this antibody can be found here.
