Product no AS10 833

Chicken anti-Rabbit IgG (H&L), HRP conjugated

Product information

Immunogen Purified Rabbit IgG

Host Chicken

Clonality Polyclonal

Purity Immunogen affinity purified chicken IgY.

Format Lyophilized

Quantity 1 mg

Reconstitution

For reconstitution add 1,1 ml of sterile water, Let it stand 30 minutes at room temperature to dissolve, Centrifuge to remove any particulates, Prepare fresh working dilutions daily

Storage

Store non-diluted antibody at 2-8°C. For storage at -20°C dilute antibody solution with an equal volume of glycerol to obtain final glycerol concentration of 50 % to prevent loss of enzymatic activity. Such solution will not freeze in -20°C. If you are using a 1:5000 dilution prior to diluting with glycerol, then you would need to use a 1:2500 dilution after adding glycerol. Prepare working dilution prior to use and then discard, Be sure to mix well but without foaming.

Additional information

Concentration: 1.0 mg/ml (E 1% at 280 nm = 13.2)

HRP-conjugate is supplied in PBS, 1% BSA and 0.1% proclin 150.

0.1 % (v/v) of Kathon CG is used as preservative. Use of sodium azide will inhibit enzyme activity of horseradish peroxidase

Application information

Recommended dilution The optimal working dilution should be determined by the investigator

Confirmed reactivity Rabbit IgG (H&L)

Predicted reactivity Rabbit IgG (H&L)

Not reactive in No confirmed exceptions from predicted reactivity are currently known

Not reactive in a no confirmed exceptions from predicted reactivity are currently know

Additional information This antibody reacts with the heavy chains on rabbit IgG and with the light chains on all rabbit immunoglobulins based on immunoelectrophoresis.

No reactivity is observed to non-immunoglobulin rabbit serum proteins based on immunoelectrophoresis.
