Product no AS10 653

Goat anti-Guinea pig IgG (H&L), HRP conjugated

Product information

Immunogen Purified Guinea pig IgG, whole molecule

Host Goat

Clonality Polyclonal

Purity Immunogen affinity purified goat IgG.

Format Lyophilized

Quantity 1 mg

Reconstitution For reconstitution add 1,1 ml of sterile water, Let it stand 30 minutes at room temperature to dissolve, Centrifuge to

remove any particulates, Prepare fresh working dilutions daily

Storage Store lyophilized material at 2-8 °C. For long time storage after reconstitution, dilute the antibody solution with glycerol

to a final concentration of 50% glycerol and store as liquid at -20°C, to prevent loss of enzymatic activity. For example, if you have reconstituted 1 mg of antibody in 1,1 ml of sterile water add 1,1 ml of glycerol. Such solution will not freeze in -20°C. If you are using a 1:5000 dilution prior to diluting with glycerol, then you would need to use a 1:2500 dilution after adding glycerol. Prepare working dilution prior to use and then discard, Be sure to mix well but without foaming.

Additional information HRP-conjugate is supplied in 10 mM Sodium Phosphate, 0,15 M Sodium Chloride, pH 7,2, 10 % (w/v) BSA,

Protease/IgG free with 0,1 % (v/v) of Kathon CG as preservative

Application information

Recommended dilution 1:10 000 -1:50 000 (ELISA), 1:500 -1:5000 (IHC), 1:10 000 -1:50 000 (WB)

Confirmed reactivity Heavy chains on guinea pig IgG and light chains on all guinea pig immunoglobulins

Not reactive in Non-immunoglobulin guinea pig serum proteins
